

Speeds Up Shipping for high volume distribution centers.

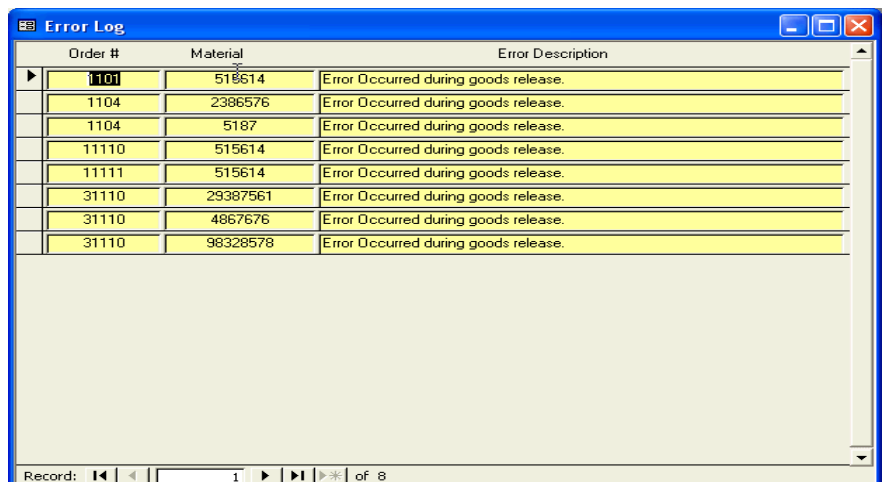

- Bulk Release sits in UA as a stand-alone module that processes large volume orders en masse.
- Ideal for companies that maintain a small number of bins
- Displays orders and details in tree view
- Allows them to be assigned to bin
- Processes 6,000 line items in approximately 20 minutes
- User checks the items to be fulfilled
- After validating, the system unchecks the items that it was unable to fulfill (for instance not having enough stock in inventory to fill the order)
- Optionally Processes Assemblies from finished goods or components (requires Advantec BOM).

- Enhanced Shipping allows mass orders to be processed without stopping for user interaction.

The system then:

- Automatically back orders items that cannot be fulfilled due to lack of stock
- Errors and exceptions are posted in exceptions report
- Exceptions for reasons other than insufficient stock are listed in a separate report

- Errors and exceptions can then be printed out and processed individually
- Errors can be viewed in the Error Log

Order #	Material	Error Description
1101	518514	Error Occurred during goods release.
1104	2386576	Error Occurred during goods release.
1104	5187	Error Occurred during goods release.
11110	515614	Error Occurred during goods release.
11111	515614	Error Occurred during goods release.
31110	29387561	Error Occurred during goods release.
31110	4867676	Error Occurred during goods release.
31110	98328578	Error Occurred during goods release.
