

## Small Business Manager Production Line-- Job Shop Features -- Custom Furniture

When taking orders the item description allow unlimited text description per item.

User can also look up and select items and default descriptions from file.

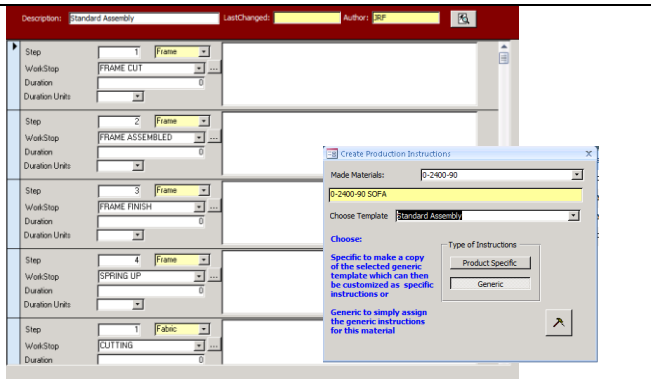

Additional features allow addition of special notes, look up on prior orders/items, payments, shipments and taking down payments on order entry.

And of course the entire operation is fully integrated with amid range accounting system.

The allows for the creation and reuse of generic and custom production routings, with expected duration

When a custom made material is released, a work order is generated with copy of the assigned routing and bill of materials allowing further customization if required. Assigning a due date and posting the work order releases the work order to production.

The made to order screen to the left allows review of requirements to me made by production personnel to assure all information, materials and special instructions are complete and accurate. Basically providing a work list for engineering review.
